FOR IMMEDIATE RELEASE
January 6, 2016

FORTHRIGHT NAMED BY CITRIX AS A FINALIST FOR A PARTNER INNOVATION AWARD

Enterprise engineering and managed services firm one of three worldwide finalist for annual award;
winner to be announced at Citrix Summit on January 13th

Miramar, FL, January 6, 2016– Forthright Technology Partners, a leading provider of enterprise engineering and managed services announced that it has been named a finalist in the 2016 Citrix Innovation Award for Partners program. This prestigious award is open to Citrix partners that have designed and delivered a solution that provides significant business value to the customer. This marks the second year in a row that Forthright has been a finalist for Citrix Innovation Award, with the recognition in 2015 for their work with the Miami Marlins Baseball organization. This year's winner will be announced at Citrix Summit 2016, to be held Jan. 11-13 in Las Vegas.

The Citrix Innovation Awards seeks to inspire Citrix customers, partners, and prospects to think differently about IT - as a key strategic component to enable business and organizational success, grow market share or compete beyond the industry norm. Entering its 3rd year, the Partner Innovation Award recognizes visionary IT solution providers who are using Citrix solutions to drive innovative technology implementations that provide business and people with new ways to work better.

"The award is designed to recognize innovative and transformative projects that leverage Citrix solutions to help customers succeed," said Steve Zoberg, VP of Operations, Forthright Technology Partners. "The solution must also provide a measurable business impact in solving the customer's challenges."

Citrix has recognized Forthright for the architecture and deployment of a global application delivery solution for Royal Caribbean International. Forthright designed and deployed a new Citrix environment in Royal Caribbean enabling high availability, failover protection, traffic optimization, improved application performance, and support for PCI compliance. The solution features several Citrix technologies, including XenDesktop, XenApp, and NetScaler, providing a robust, consistent and predictable user experience and the ability .

"This has been a multi-year labor of love, and there are additional projects on the table as we move into 2016," commented Frank Merino, Forthright's Director of IT Engineering. "We are delighted to be considered for the 2016 Citrix Innovation Award for Partners but, more importantly, we are proud of the business benefits we've been able to achieve for Royal Caribbean."
