

At Forthright Technology Partners, we know Citrix and have the end user computing expertise to help you leverage your Citrix investment to its fullest potential.

Forthright has been a Citrix partner for over 25 years. Forthright is also one of the few certified partners Citrix regularly trusts with outsourced Citrix Consulting Services work.

If you need a certified Citrix partner, contact Forthright.

Our award-winning team of engineers and architects is certified to help with your existing Citrix environment or the implementation of Citrix solutions. We have cross-technology expertise across the entire Citrix and end user computing ecosystem.

We specialize in Workspace, Citrix App Delivery, and Security. However, Forthright goes beyond the Citrix product line to focus on the overall end user experience.

Work with Forthright's team of skilled, certified professionals to implement and optimize your Citrix services:

- Prepare for Citrix's future product road-map
- Answer questions about Citrix products
- Optimize your Citrix environment
- Provide stabilization services for unhealthy environments
- Maximize your Citrix renewal
- Obtain additional licensing

Our team begins by assessing your current infrastructure to better understand your needs, challenges, and goals. With that knowledge and our unique expertise, the Forthright team will design, implement, and optimize technology that supports your employees and business goals.

Forthright can support ALL your IT needs with:

- Project-based professional services
- Managed & co-managed services
- Health checks & assessments
- Cybersecurity & compliance
- Collaboration and productivity solutions focused on automation and governance

Why work with Forthright?

Forthright's mission is simple, yet significant: **Exceed Expectations**. This is our goal in every interaction, every project, every relationship. We are committed to providing value to our clients by acting in their best interest.

It all comes down to **experience**...

- Our clients' exceptional **experience** working with us.
- Our team's extensive **experience** with technology.
- The end user's seamless day-to-day **experience**.

From strategic consulting services to optimizing your IT environment to providing additional resources, Forthright can help your business succeed.
